## Information

**HIGHLANDS NURSERY SHIPMENTS** are made from Pineola, N. C., freight station, and **prices in this list are made on this basis.** Freight and express rates gladly quoted. Via Norfolk Steamship Lines, deliveries to northern and eastern points are quick and rates low.

**SALEM BRANCH NURSERY SHIPMENTS** are made from Salem direct, and our **special price-list must be used in ordering.** Prices are about 25 per cent higher than for similar stock at our main **Highlands Nursery.** A fine stock of specimen Rhododendrons, Azaleas, Conifers, etc., may be seen at Salem Branch Nursery, and deliveries to eastern points rarely take more than a day or two.

**SHIPMENTS OF "COLLECTED" RHODODENDRON MAXIMUM AND KALMIAS** are from our special fields in Pennsylvania and the South, depending on destination and quality of stock desired. The best clumps come from the South from high altitudes.

**"COLLECTED" RHODODENDRON CATAWBIENSE AND RHODODENDRON PUNCTATUM** come only from the South.

**OUR NURSERIES ARE UNIQUE,** being the first and only to grow Native American Ornamentals, and we now have the only large and complete stock of Hardy American plants in existence.

**THE LOCATION OF HIGHLANDS NURSERY** also is unique, an elevation of 3,800 feet insuring unquestioned hardiness.

**SHIPPING BEGINS IN SEPTEMBER,** when we send out large Rhododendrons, Kalmias and other evergreens, and bulbs and herbaceous plants, general stock going out in October and November and in spring from about March 1 to May 15. Give shipping instructions, unless you wish to leave it to us. **We use our best judgment, but assume no risk.**

**OUR EXPORT SHIPMENTS** reach the most remote countries in perfect condition; we have exported for over 25 years and know how to pack.

**DESCRIPTIVE ILLUSTRATED CATALOGS** free on request, and advice on the right way to grow Rhododendrons, Azaleas and other native plants gladly given.

# KELSEY'S Hardy American Plants Rhododendrons and Azaleas

## TREES, SHRUBS AND VINES, continued

### RHODODENDRON CATAWBIENSE

This is not the common imported "seedling Catawbiense" so-called, which is a half-hardy hybrid with little true **Catawbiense** blood in it. The true **Catawbiense** grows only in the high southern Alleghenies and is the **finest of all Rhododendrons** considering its extreme hardiness and remarkable texture of foliage—a deep shiny green, far superior to **Maximum**.

For massing there is no hardy broad-leaved evergreen equal to it for the northern United States. It is a free-bloomer, with large, bright red-purple trusses, in marked contrast to the blue-purple of the half-hardy hybrid noted before. All plants are bushy with balls (except collected **seedlings**) and clumps have diameter corresponding to height with many stems, and are mostly heavily budded. The larger clumps for center of mass-planting should not be feathered to the ground for best effects, but have thick bushy tops. Special selections are charged for extra and we can supply perfect specimens for any situation.

Rhododendrons are the basis of any successful mass planting for winter effects. If you don't know how to advise your customers so they may grow them successfully as common shrubs, write us. **There is a secret**, and 24 years' experience in growing ericaceous plants enables us to "tell how." Our stock cannot be duplicated elsewhere in quantity or quality. Freight rates from southern points are reduced and we gladly quote you to any point, and give the information you want about "car-lots."
